

August 1, 2019

Price Increase Notice

Effective August 1, 2019 SolarCraft will be increasing prices for the Service & Maintenance work we perform on Solar Pool heating systems. Please understand that the cost of performing these services has increased significantly, due to increased travel costs, traffic congestion, and sharp increases in labor costs as a result of fire rebuilds and construction in our area. We continue to try to maintain fair and competitive prices for all services to deliver the highest value to our customers.

New prices are outlined below:

\$249.00 - Spring Tune-up

- Check panels for any damage
- Replace caps and close drains
- Tighten and secure all clamps
- Check solar control and valve operation
- Set for maximum temperature
- Check for proper flow to solar panels
- Set all pump timers for maximum solar efficiency
- Repair all minor leaks
- Check for any obvious or potential problems
- Leave a written report of all work performed

\$199.00 - Winterization

- Check solar control for proper function in "OFF" mode
- Disable solar control to prevent accidental turn on
- Remove drain caps and/or disconnect pipes from panels to assure total drainage
- Set filter pumps and sweep clock for winter operation and energy savings
- Close the solar isolation valves
- Leave a report of work performed

\$349.00 - 1 Year of Spring Tune-up/Winterization Service Agreement

Service rates for additional work:

- \$249 for first 30 minutes of work
- \$99 for each additional 30 minutes of work for SolarCraft installations
- \$124 for each additional 30 minutes of work for non-SolarCraft installations

Materials charged separately.

We sincerely appreciate your business and interest in SolarCraft services. For more than 35 years, SolarCraft has been the leading solar provider in the North Bay and remains committed to building a more sustainable community.
