

## Certified Electrician, Battery Storage and Solar PV

Novato, CA

*Everyone counts at SolarCraft, as a 100% Employee-owned business, we are all partners in our business, earn competitive wages with PTO, Holidays, and Benefits.*

**SolarCraft's Certified Electrician (C-10 or C-46)** will be based in our Novato, CA office and work in Marin, Sonoma and Napa counties. This is a field construction role that involves the installation and service, of **solar electric (PV)** and **battery energy storage systems (BESS)**, primarily residential systems – as well as performing Quality Assurance/Quality Control during design/build of new projects.

The primary responsibilities of the **Certified Electrician** are:

- 1) Be SolarCraft's license holder and RMO (responsible managing officer).
- 2) Work safely at all times, and ensure the safety of yourself, your team, & clients at the sites you are on.
- 3) Perform BESS installations, main AC panel upgrades and other electrical work related to BESS and PV installations.
- 4) Perform on-site service, troubleshooting, and repair of BESS and solar electric (PV) systems.
- 5) Work collaboratively with Foremen/Superintendents, Project Managers and team to ensure safety, quality, and client satisfaction are achieved.

### Requirements & Responsibilities:

- California certified electrician. Must be C-10 or C-46.
- Install, evaluate, and repair BESS and solar PV system components including but not limited to installing electrical service panels, electrical sub-panels, batteries, BESS control components, conduit and wire, electrical switchgear, switches and monitoring systems.
- Have relevant previous hands on experience in BESS and solar installations or construction, troubleshooting and service/repair of systems.
- Must be reliable, and demonstrate highly-ethical behavior and good judgment.
- Must be able to routinely lift 75 lbs., climb ladders, work in enclosed spaces, with technical build aptitude and familiarity with construction build sites
- Knowledge and ability to use construction hand tools, measuring devices, and power drills, conduit bending tools/machines, portable band saws, electrical measuring and testing devices, etc.
- Ability to work safely and confidently on roofs with ladder access, familiar with safety equipment, and healthy respect for working safely.
- The ability to read and understand project plan-sets, single-line drawings, and other design documents.
- Maintain a clean and orderly work site and at all times and represent the company well.
- Have a clean driving record and valid CA driver's license.
- High School graduate or equivalent
